

HP19-26

Prince Castle's HP19-26 heater panels use infrared heaters that hold fried foods longer, have a better appearance, and are in better condition than foods held with cal rod heaters or heat lamps.

Work with your dealer / fabricator to determine what size heater panel you need and the best way to install.

STANDARD FEATURES

- Create heat that holds fried foods longer and better than calrods and heat lamps.
- Minimizes the heat bleeding out of the heated area, thus providing a more comfortable work environment for your employees.
- Installs easily into stainless steel fabrication.
- Can be retrofitted into most existing fabrication that utilizes cal rods or heat lamps.
- The use of the HPC-2 controller allows the heater panels to cycle on and off thus increasing energy efficiency.
